Question Text:

Universe: All respondents

Note: The values represent the year and the beginning month of each collection period based on as planned for the 2022 collection. However, the start of collection was delayed and started in February rather than January. To accommodate the missed collection, the first period was extended to May and overlaps the second period.
Data for youth aged 12 to 17 were not collected in the second collection period of 2022, meaning that one-third of the youth population is represented in each of the other three collection periods. Analysis by collection period (SAM_CP) or by month of interview (ADM_MOI) is not recommended for the population aged 12 and over. See the user's guide for more details.
